

We are introducing a new **annual treatment review** system...

...for all people who have a chronic health problem or who take regular medication.

From **1st April 2017** we request that you book in for your annual treatment review during the month of your birthday.

You are likely to see the phlebotomist or health care assistant first. You may then need to see either the nurse, GP or both a week later.

If you are concerned you may be due for a review before your birthday please ask at reception.
